

**A METHOD OF ORIENTATING A TEMPLATE WITH
RESPECT TO A SUBSTRATE IN RESPONSE TO A
FORCE EXERTED ON THE TEMPLATE**

ABSTRACT OF THE DISCLOSURE

[0074] The present invention includes a method of orientating a template with respect to a substrate spaced from the template, the method including, rotating the template about a first and a second axis to orientate the template with respect to the substrate and maintain the orientation in response to a force being exerted upon the template.
